ABOUT ME

I consider myself a creative thinker and a problem solver who is passionate about solving real-world problems. I have a keen interest to be exposed to the bleeding edge of technology to innovate with the community as well as to build effective and reliable products fast. I have worked with many technologies that scale from server-side to client-side, from the circuit level to the OS to the application level with more than 2 years of experience. I am passionate about developing applications that make technological muggle people's lives easier.
